

# Population and Conflict

by D. Acemoglu, L. Fergusson & S. Johnson (*Review of Economic Studies*, 2019)

The folder *Datafortheweb* contains the data and programs required to replicate the Tables and Figures reported in the main text and in the appendix of the paper.

## Folder content

- **Data:** includes all the dataset recalled by the do files and required to replicate the analysis.
- **Programs:** includes all the Stata do files required to replicate the results.
- **Results:** empty folder that works as a repository for the Table and Figures.

## Instructions

### 1. Preliminary set-up before running the programs

- (a) Install the following accessory user-written commands (in Stata, type command *ssc install* followed by) :
  - xtivreg2
  - ivreg2
  - texdoc
  - dataout
  - outreg2
  - xtabond2
  - tmpdir
  - binscatter
- (b) Download the package developed by Goldsmith-Pinkham, Sorkin and Swift (2018) and available on P. Goldsmith-Pinkham's github page (this is required to run the analysis of Table A-14 "Rotemberg weights")
- (c) Declare the program *acreg* (included in the Programs folder and developed by F. Colella, R. Lalive, S.O. Sakalli, and M. Thoenig) by running line 42 of the *Master.do*.

## 2. Replication

- (a) Open the file *Master.do* and replace the path to the *Datafortheweb* folder at line 7.
- (b) The output Tables or Figures created by the dofiles are stored in the folder *Results*.
